PROJECT

CLI Based Simple Bank Application

- Created by using C++ with the OOPs concepts with features like Account number Generation and Fund transfer option.

Temperature Sensor - Arduino UNO

- By using the LM35 Temperature Sensor and first tested using Tinkercad Simulation tool and upgraded the project to send data to ThingSpeak for Data collection in Cloud

COURSEWORK

UNDERGRADUATE

Operating Systems
Unix Tools and Scripting
Cloud Computing
DBMS
Computer Networks
Data Structures and Algorithms
Software Engineering
Functional Programming

CERTIFICATIONS

- AWS - Designing Blockchain Solutions
- Kerala Blockchain Academy - Ethereum Fundamental Program
- Kerala Blockchain Academy - Blockchain Foundation Program
- CS120 - Bitcoin for Developers I

SKILLS

PROGRAMMING

Java • C++ • Python

C • Shell • HTML

CSS • Javascript

Familiar:

MySQL • MongoDB

IaaS (Azure) • Windows

Linux • Docker • Bash
